Editing

How to add Transparency? How to make an image Transparent

Lunapic fully supports image transparency and offers a few ways to add transparency to images.

The quickest way if you have a plain background is to use [Menu -> Edit -> Transparent](#)

You can also use the scissors tool to cut out areas of the image. That's [Menu -> Edit -> Crop](#).

LunaPic now support Alpha Transpency (translucence) [Menu -> Adjust -> Alpha Transparency](#)

To preserve transparency, you need to save the image as gif or png.

Example of image transparency:
