

## Editing

**None of my pictures are editing in the art section anymore, I've been using this site for a while because it's my favourite, I use it for art project covers... why isn't it working? big inconvenience.**

Sorry about the trouble. I'll be happy to help you. What type of images are you using? Have you tried the sample iamges? Do they work. Follow up with support -at-lunapic.com for more help.
