

Editing
Hi Guys,

**This is the second email I'm sending. Please
please reply with an answer.**

**When I am blending two images, I cannot drag
the corner of the overlaying image to resize it. I
could do this a couple of weeks ago but not
anymore.
Instead when I try to resize by dragging a corner,
it just moves the image around.**

Please can you help me.

Thanks and regards,

Mark

What browser are you using? It's working for me.
