

## General

### **My hosted images won't load on EBay anymore.**

imgur.com provides image hosting for LunaPic. It's come to our attention on 3/25/15 that IMGUR hosted images no longer appear on ebay pages. We believe that they blocked "commercial" usage of imgur images, and so blocked all ebay listings. Lunapic has added another image hosting option: [UltraImg](http://lunapic.com/?ultraimg) to our lineup. You can find the host on ultraimg link below your picture, next to imgur.
