

Bugs

I can't take web cam picture as I did before ON Google Chrome or Mozilla Firefox server anymore.

Thank you for reporting that bug. The bug you mentioned was fixed on 11/11/15

Please note that you do need a webcam and flash player to use the webcam feature

Mobile devices can usually take pictures from the file upload or browse dialog.

webcam capture: <http://www.lunapic.com/editor/?action=webcam>
