

Bugs

Why Are My Pictures Only 1436 Px Now?

**there were all setting in at 1560 px.
before that it was 1570 px.**

That is based on your browser window size. Make sure your computer is at full resolution, and your browser window is at full screen. (if you have dual monitors, you can spread your browser window onto both screens for even larger resolution)

Unique solution ID: #1082
